

**SAB - Trafo, s.r.o.**

## **GENERAL USE TOROIDAL TRANSFORMERS ACCORDING TO EN 61558-1**

We produce a broad assortment of transformers with power range from approx. 10 VA up to approx. 5000 VA.

The transformers enable various installation designs to suit the requirements of you - our customers.

- small built-in dimensions
- lower weight than traditional transformers
- high efficiency
- power savings during no load operation
- negligible leakage of magnetic flux and hum
- simple installation
- parameters and design according to your requirements, not restricted to standardized dimensions
